Aug 2023 - Jan 2024

Hacker's University APC Learning Solutions

- Led the training of cybersecurity courses, including CCNA, CEH, and CPENT, emphasising best practices in securing information systems.
- Developed and delivered presentations on security protocols, network configurations, and risk management.
- Managed time sheets, scheduled classes, and tracked student progress.

CEO: Ayesha Ma'am (+918296621149)

### L-II System Administrator

July 2022 - Jan 2023

Geeks Solutions Pvt. Ltd.

- Managed security operations of web hosting platforms (cPanel, WHM, Proxmox).
- Conducted root cause analysis and implemented security measures across Linux systems.
- Collaborated with clients to troubleshoot security issues and maintained compliance.
- Gained experience in Shell scripting, cloud computing technologies.

HR: Abhijit Sir (+919158911301)

### Part-Time Associate

May 2021 - Oct 2021

Datamatics Pvt. Ltd.

Sep 2020 - March 2021

- Proctored AWS and Linux exams, troubleshooting technical issues in real-time to ensure secure testing environments.
- Led a team of four, managing customer-facing interactions and resolving issues under high-pressure situations.

TL: Harshad Sir (+919284380681)

---

## EDUCATION

### Masters In Network And Information Security (Pursuing)

Sep 2024 - Sep 2025

College: Griffith College Limerick, Ireland

- Managing Information Security
- Computer Forensics
- Computer Network and Inter Networking

### Bachelor of Computer Science (8.2 CGPA)

May 2020 - July 2023

College: Savitribai Phule Pune University, Pune, India

- Python, Java Script, C & C++
  - Data Structures in C
  - Embedded Systems
- 

## SKILLS

### Technical

- |                   |               |                       |
|-------------------|---------------|-----------------------|
| • Linux           | • Networking  | • WHM & cPanel        |
| • Shell Scripting | • Subnetting  | • PROXMOX             |
| • DNS             | • Pen-testing | • Web vulnerabilities |
| • Proxies         | • Burp-suit   | • Python              |

### Non-Technical

- |                   |                      |                      |
|-------------------|----------------------|----------------------|
| • Communication   | • Listening          | • Teaching           |
| • Typing          | • Planning           | • Learning           |
| • Convincing      | • Team Collaboration | • Leadership         |
| • Problem Solving | • Presentation       | • Client Interaction |
- 

## EXTRA ACTIVITIES

### YouTube Channel

Matrixexploit - *1k Subscribers*

- This channel is for the students who cannot afford the high fees of cyber security classes
- Here I teach concepts related to cyber security like bash, linux, basic vulnerabilities and more

### YouTube Channel

Genz vlogging - *new channel*

- This channel I use it for posting my memories but in a movie style, you can see my editing skills
  - Here I vlog the places I like and I visit
- 

## Relevant Projects

### Web Vulnerability Testing

- Conducted penetration testing on web applications, identifying security loopholes, and delivering reports for mitigation strategies.

### SubHuntMaster - On GitHub

Tool - *Powerful tool for the subdomain enumeration*

- This tool automates the process of subdomain enumeration for a given domain.
- It performs DNS enumeration, web scraping, and checks certificate transparency logs to discover subdomains, and then verifies and resolves them.
